Specialization Introduction:  
Excel to MySQL: Analytic  
Techniques for Business

Introduction to Managing  
Big Data with MySQL

	Welcome to Managing Big Data with MySQL	1 min
	What You Will Learn in This Course	10 min
	Course Overview	10 min
	IMPORTANT FOR EVERY LEARNER	10 min
	Special Thanks!	5 min
	Feedback Survey Information	10 min

Lesson 1: Problems  
Databases Solve

Lesson 2: Database Design  
Tools

Lesson 3: Building Your Own  
Entity-Relationship  
Diagrams

Lesson 4: Building Your Own  
Relational Schemas

Lesson 5: Test Your  
Understanding

There were many contributors to this course, outside of the course team. We'd like to offer special thanks to:

**David Douglas, University Professor, Department of Information Systems, and Michael Gibbs, Associate Director of Enterprise Technology, Sam M. Walton College of Business, University of Arkansas** for providing access to a Dillard's database and use of their online query tool Teradata Viewpoint/SQL Scratchpad for learners in the course.

**Eliot Cohen, Producer, and [Dognition.com](#)** for interview clips and for providing a database for use in the course MySQL exercises (Jupyter notebooks).

**Dr. Nenad Jukić, Professor of Information Systems and the Director of Business Intelligence and Data Warehousing, Graduate Certificate Program at the Quinlan School of Business, Loyola University Chicago,** for providing several tutorial videos and interview clips, and for use of materials from his book, [Database Systems: Introduction to Databases and Data Warehouses](#), Pearson, 2013.

**Ryan Luecke, Senior Software Engineer, [Box.com](#) and Elena Grewal, Data Science Manager, [Airbnb.com](#)** for providing interview clips used in our videos.

**Mark McCahill, System Architect, and Elizabeth Wendland, Senior IT Analyst, Office of Information Technology and the Office of Information Technology as a whole,** Duke University for providing and supporting the Jupyter notebook infrastructure and the LTI connection between Coursera and Jupyter for our course.

**Gary Thompson, Associate Director of Data Information Services and Steven Sample, Data Processing Specialist, [Social Science Research Institute](#),** Duke University for consultation and content review throughout the course.

**Michael Daul, Digital Project Developer, Library Information Technology, Duke University** for developing and supporting the Teradata login distribution survey and database.

**All those who appear in the "How Do You Pronounce SQL?" video clip** in the "What You Will Learn in This Course, and Why" video: Amy Kenyon, Willie Williamson, Brandon Fain, Jailing Zhong, Hunter Nisonoff, Adegeke Ojewsle, Ramanujan Tensraghavan, Kiersten Ruta, Matt Phillips and Susan Rodger.

**Graduate students Samit Sura (Masters of Economics program), Kartik Vaithylingam (Masters of Engineering Management program), and Nitin Raviprasad (Masters of Engineering Management program), Duke University** for help preparing and reviewing data sets and course materials.
