Web Applications for Everybody Specialization

Build dynamic database-backed web sites. Use PHP, MySQL, jQuery, and Handlebars to build web and database applications

About This Specialization

This specialization is a basic introduction to building web applications, and is an excellent starting point for learners who already have a basic understanding of programming, HTML, and CSS. In Web Applications for Everybody, learners will be introduced to web and database applications in PHP, using SQL for database creation, as well as functionality in JavaScript, jQuery, and JSON.

This specialization (and its prerequisites) will prepare learners with no experience in programming or technology for an entry level web developer position in PHP.

Created by:  UNIVERSITY OF MICHIGAN

 **4 courses**
Follow the suggested order or choose your own.

 **Projects**
Designed to help you practice and apply the skills you learn.

 **Certificates**
Highlight your new skills on your resume or LinkedIn.

Projects Overview

The courses in this specialization feature assignments requiring development of increasingly challenging web sites, to demonstrate basic concepts as they are introduced. The projects will demonstrate the students skills in HTML, CSS, PHP, SQL, and JavaScript.

Courses

 **Intermediate Specialization.** Some related experience required.

COURSE 1

Building Web Applications in PHP

Current session: Apr 9

Commitment 8-10 hours per week

Subtitles English

About the Course

In this course, you'll explore the basic structure of a web application, and how a web browser interacts with a web server. You'll be introduced to the request/response cycle, including GET/POST/Redirect. You'll also gain an introductory understa... [more](#)

You can choose to take this course only. [Learn more.](#)

COURSE 2

Introduction to Structured Query Language (SQL)

Current session: Apr 9

Commitment 8-10 hours per week

Subtitles English

About the Course

In this course, you'll walk through installation steps for installing a text editor, installing MAMP or XAMPP (or equivalent) and creating a MySQL Database. You'll learn about single table queries and the basic syntax of the SQL language, as well as ... [more](#)

You can choose to take this course only. [Learn more.](#)

COURSE 3
