[Module 4: Installing PHP and SQL](#)
[Module 5: Introduction to PHP](#)
[Module 6: PHP Arrays](#)
[Module 7: PHP Functions](#)
[Module 8: PHP Forms](#)
[Course Info](#)

Module 4: Installing PHP and SQL

["The Missing Link" Textbook Chapter: 1, 3, 4, 37, 39, 41](#)

Installation Handouts

In this page, you will install a programmer text editor, install a bundled all-in-one PHP/MySQL application, and explore that application briefly.

We have separate pages for each of the commonly used Operating Systems:

- [Setting up the MAMP PHP/MySQL Environment on a Macintosh](#)
- [Setting up the MAMP PHP/MySQL Environment on a Windows](#)
- [Setting up the XAMPP PHP/MySQL Environment in Microsoft Windows](#)

You can use any software you like - I d most of my demos using MAMP on the Macintosh so using MAMP might be easier on Windows. If you encounter a problem getting MAMP to work on Windows, it is OK to use XAMPP.

Other Resources

- [Bonus: Brian Behlendorf on the Apache Software Foundation](#)
